

Strategic Partnerships

The Data Entry and Explorative Platform (DEEP) is an online platform established by analysts for analysts to strengthen collective sense-making during humanitarian crises. DEEP is set up to compile, store, structure and review qualitative data and information, benefitting the wider humanitarian and development community.

DEEP is governed by a multi-stakeholder consortium that consists of IFRC, UNOCHA, UNHCR, OHCHR, UNICEF, JIPS, Okular-Analytics, iMMAP and IDMC. The DEEP secretariat is established and hosted by Danish Refugee Council. The platform is developed and maintained by the Data Friendly Space - DEEP's principal technology partner.

DEEP is seeking to expand its growing network through strategic partnerships and technical collaborations in the following areas:

Technology enhancement

Information & data integration

Enhance the use of the platform

Joint ventures & funding

TECHNOLOGY

01

- Strategic integrations with other platforms and software for specific use cases.
- Collaboration to improve or develop new modules and features of DEEP.
- Research and development of machine learning, Natural Language Processing and Artificial Intelligence.

DATA & INFORMATION

02

- Two-way integration with existing data platforms and repositories.
- Data sharing agreement for specific use cases.

03

USAGE

- Strategic collaboration to introduce or enhance the use of DEEP at an institutional level.
- Partnerships to improve structured data collection and analysis of qualitative data in humanitarian and development space.

04

JOINT VENTURES

- Joint funding proposal to improve the use, capabilities and impact of the platform and services.
- Opportunities to fund DEEP technology road map.

DEEP STRATEGIC PARTNERSHIP

Contact the DEEP Project manager (pm@thedeeep.io) if you are interested in contributing to the growth and success of the DEEP as a collaborative analysis platform for effective aid response.
